

HAVE YOU THOUGHT ABOUT THE EXPENSE GENERATED BY THE LIGHTS THAT WE FORGET TO TURN OFF?

It is very common to enter the WC of a restaurant and find **the light** on because someone forgot to turn it off. That untimed light will **consume energy and money for long hours**.

With **TEMPOLED** and in less than 5 minutes, forgetting to turn off the lights **will no longer be an expense**.

Example of a WC in a restaurant

AFTER

BEFORE

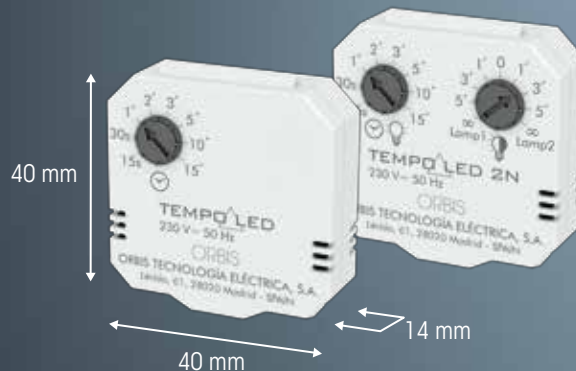

Its **application is ideal** in restaurants, residential buildings, offices, hotels, homes... where it can be installed in corridors, stairs, dressing rooms, storage areas, cleaning rooms, garages, basements or any other transit area.

The installation is **very fast and simple** since it does not need additional wiring and you only need to replace the existing switch with a push button.

If you are looking for a timer for dimmable lamps, we recommend...

TIMER FOR DIMMABLE LAMPS

TEMPO LED 2N

- Initial timing at 100% illumination.
- When the timing period set has finished the lighting reduces to 25% to maintain a security/courtesy light; permanently or limited duration.
- Avoid complete darkness in corridors, dressing rooms or bathrooms
- Compatible with dimmable incandescent, halogen lamps and LED leading edge or trailing edge lamps.
